The entry for the book in the WUW catalogue 2018:

Barbara Bokus, Ewa Kosowska (eds.), CZŁOWIEK w SYTUACJI – nie tylko z perspektywy psychologa. Studia inspirowane teorią Tadeusza Tomaszewskiego [HUMANS IN SITUATIONS Not Only From a Psychologist's Perspective (Studies Inspired by the Theory of Tadeusz Tomaszewski)]

A collection of texts from different areas of psychology as well as cultural anthropology, paleogeography and geology, sociology, political philosophy, philosophy of religion, theology, history, Oriental studies, cultural studies, lexicography, pedagogy, genetics and archeology, inspired by Professor Tadeusz Tomaszewski's theory of situations. The authors show what contemporary research contributes to our understanding of the notion of a situation and what there is new to say about humans in the multitude of situations in which they are agents. As Prof. Tomaszewski underlined on many occasions, a situation is always someone's, and not only do situations affect people, it is also people who change situations by their actions. Publication prepared in association with Wydawnictwo Uniwersytetu SWPS in Warsaw.

4. In connection with the end of the current term in office, the foundation's Board requests that the foundation's Program Council appoint a new Board of the Tadeusz Tomaszewski Foundation for the Development of Polish Psychology. In the opinion of the current Board, Prof. Urszula Jakubowska, PhD hab. (Institute of Psychology of the Polish Academy of Sciences), is an excellent candidate for the foundation's Chair of the Board.

On behalf of the Board
Barbara Bokus
