

ARE YOU HIRING?

FIND OUT WHAT COMPETENCES OUR GRADUATES CAN BRING TO YOUR COMPANY!

SWPS University of Social Sciences and Humanities offers studies in psychology, management, law, cultural studies, language studies, journalism, design, and computer science. Our graduates are able to work with people and for people, apply creativity in areas that serve people, create and implement effective solutions for the world of culture, business and social organizations. All study programs include teaching of practical skills and competencies. We teach based on real-life examples: people, organizations and societies. Find out what competences our graduates can bring to your company.

PSYCHOLOGY

In the field of psychology, we pursue numerous specializations that allow our students to specify the subject of further professional development. We teach, among others

- conducting diagnosis and designing intervention strategies
- the neuronal basis of human behavior
- professionally supporting people at various stages of development
- application of psychological knowledge in business contexts and in human resource management processes
- work in an intercultural environment / multicultural teams
- application of psychological knowledge in the area of justice
- advanced work with a group, e.g. in a conflict, crisis or catastrophe
- creative problem-solving and decision-making in the organization

Graduates of Psychokryminalistyka are able to create a profile of an unknown perpetrator of a crime, they can effectively interview witnesses and suspects, they know what actions can be taken against convicts so that they do not return to the crime.

MANAGEMENT

In the area of management, we implement a new model of educating managers - change leaders who know how to achieve ambitious goals and are prepared to create innovative business ventures.

Graduates of management and leadership learn to identify the needs of the digital world, diagnose problems and implement innovative programs thanks to practical classes involving the analysis of various business scenarios.

In turn, human resources management graduates are able to support organizations in modifying business models and adapting human capital management to global trends. They can also justify their decisions with specific data, thus becoming real business partners.

LAW

At the Law School, in addition to thorough knowledge, students acquire practical legal skills and competences in other areas useful in the work of a lawyer, including managerial and psychological skills. Our lawyers can talk to people, explain complex legal situations, negotiate and resolve conflicts.

After majoring in law in business, graduates have knowledge of the legal aspects of running a business and are equipped with competences such as conflict management and negotiation skills. They have developed managerial competences and know business English.

For people interested in politics and how the world is changing, we have created a direction for public life. Graduates of this faculty are able to study social phenomena, analyze political events, mobilize people around important issues and lead joint projects.

CULTURAL AND LANGUAGE STUDIES, AND JOURNALISM

During cultural studies, we teach our students to understand contemporary culture in all its complexity. We educate sensitive and empathetic humanists who can diagnose the problems of reality, as well as create and implement effective solutions for the world of culture, business and social organizations. We specialize in: designing innovations and services (School of Ideas), contemporary culture, media and digital culture as well as manager-agent-producer.

Philological studies are used to master a selected foreign language at the C1 level, explore the practice of its use in communication and business, and learn about issues in the field of literature, history, culture, politics and social life of the selected language area. We also offer the possibility of intensive learning of two foreign languages.

During journalistic studies, we teach cooperation, among others with specialists from various media industries. Under their supervision, students conduct workshops in professional radio and television studios and learn about the tools of a contemporary journalist. Upon graduation, students specialize in a selected field: internet marketing, online communication, branding, advertising and public relations, digital and social media.

DESIGN

We run the School of Form - an innovative design school that is a center of knowledge, research and innovation, a place where designers are able to understand people and discover their dreams. Students can choose from four specializations: communication design, domestic design, fashion design, and industrial design.

Graphics is an innovative project due to the specificity of the program, which is a response to the requirements of the constantly developing labor market within the creative industries. The program of our graphic studies is a unique combination of knowledge in the field of graphic design, social communication, psychology and psychophysiology of vision.

In the field of psychology and computer science, we specialize in: e-health - designing internet interventions for health, psychology of artificial intelligence (AI) - designing intelligent behavior models, thanks to which robots are able to make decisions, learning and abstract reasoning, and UX Research & Design - service design and digital products.

COMPUTER STUDIES

We teach computer science students much more than just programming or application design - also the skills of perceiving and solving problems using knowledge and IT tools, with openness to social and human issues. Solid foundations in the field of algorithms, data structures, computational

complexity, optimization or analysis, combined with the necessary soft skills, provide competences necessary to work in the IT industry, among others in startups, corporations or your own company.

The SWPS University community is constantly open to emerging educational needs. We also pursue our passion for designing and conducting education by creating numerous postgraduate studies. We invite you to familiarize yourself with the rich offer of postgraduate education.
